Education

Vellore Institute of Technology

B.Tech Computer Science and Engineering (CGPA: 8.22)

Aug 2021 – May 2025

Vellore, Tamil Nadu

Technical Skills

Languages: Java, SQL, JavaScript, HTML, CSS, Python, TypeScript

Frameworks: Spring Boot, Angular, REST APIs, Tailwind Css, Junit, Mockito, React, Microservices, FastAPI

Databases: MySQL, PostgreSQL, Redis

Tools & Platforms: Git, GitHub, Postman, Maven, Swagger, Docker, Jupyter Notebook, IntelliJ Idea, VS Code

Professional Experience

Cognizant Technology Solutions

Aug 2025 – Present

Programmer Analyst Trainee

- Implemented **structured application logging** across service layers using **SLF4J/Logback**, enabling faster debugging and **root cause analysis** of production incidents.
- Wrote **unit and integration tests** using **JUnit & Mockito** to verify business logic, and tested **REST API endpoints** using **Postman**, helping reduce bugs and improve overall code quality.
- Actively contributed to a **6-member Agile/Scrum team**, participating in **code reviews**, resolving production issues, and delivering sprint features **on schedule**.

Projects

Hotel Management System

Mar 2026

- Designed and implemented **20+ RESTful APIs** for room booking, reservation workflows, and customer management.
- Implemented **concurrency control** via **database locking**, preventing **double bookings** across **10+ concurrent reservation requests** while ensuring data consistency.
- Engineered **3+ Cron-based background tasks** for booking confirmations, reservation expiry handling, and system maintenance.
- Applied the **Decorator design pattern** to build a **dynamic pricing engine** supporting **7+ pricing rules** for flexible real-time pricing.

Healthcare Appointment Management System

Dec 2025

- Developed a **full-stack multi-role healthcare platform** (Admin, Doctor, Patient) with **40+ REST APIs** and **18+ relational database tables**, covering appointment scheduling, patient records, and prescription management.
- Implemented **JWT-based stateless authentication** with **RSA-signed tokens** and **role-based access control (RBAC)**, integrating Angular route guards and backend method-level security to enforce secure, role-specific data access.
- Designed and developed a **doctor-facing Angular dashboard** for managing patient records, appointment history, and prescription tracking, streamlining **clinical workflow efficiency**.

E-Commerce Shopping Platform

May 2025

- Built a **full-stack e-commerce platform** using **Java, Spring Boot, React, and PostgreSQL**, supporting product catalog management, shopping cart, and end-to-end order processing.
- Developed **20+ RESTful APIs** for product and order management, and integrated the **Stripe payment gateway** to enable secure online transaction processing.
- Built a **role-based admin dashboard** using React for **inventory tracking and user management**, improving operational visibility and simplifying order handling.

Certifications

- AWS Certified Cloud Practitioner:** Possess a foundational knowledge of AWS cloud services, architecture, security, and pricing models, including services like EC2, S3, RDS, IAM, and VPC. [Certificate](#)
- Data Structures in Java:** Acquired a strong understanding of data structures and algorithms in Java, including arrays, linked lists, stacks, queues, trees, and sorting/searching techniques. [Certificate](#)
